JFLAP Better UI

A more usable desktop automata editor

JAVA SWING FLATLAF

THE IDEA

Modern interaction for a classic automata tool.

Agency collaborator: shiowoneko

PROJECT BRIEF / 03

JFLAP Better UI

WHAT THE PROJECT DOES

Modern interaction for a classic automata tool.

THE PROBLEM

The original editor has aging visuals and slow workflows for repeated canvas actions and exports.

CREDIT / ROLE

shiowoneko. Agency collaborator project; exact module contribution was not specified.

SOLUTION & STACK / 03

JFLAP Better UI

HOW IT WORKS

The repository wraps JFLAP with FlatLaf themes and adds a command palette, canvas copy/paste, undo/redo, zoom and image export. Its screenshot illustrates theme customization.

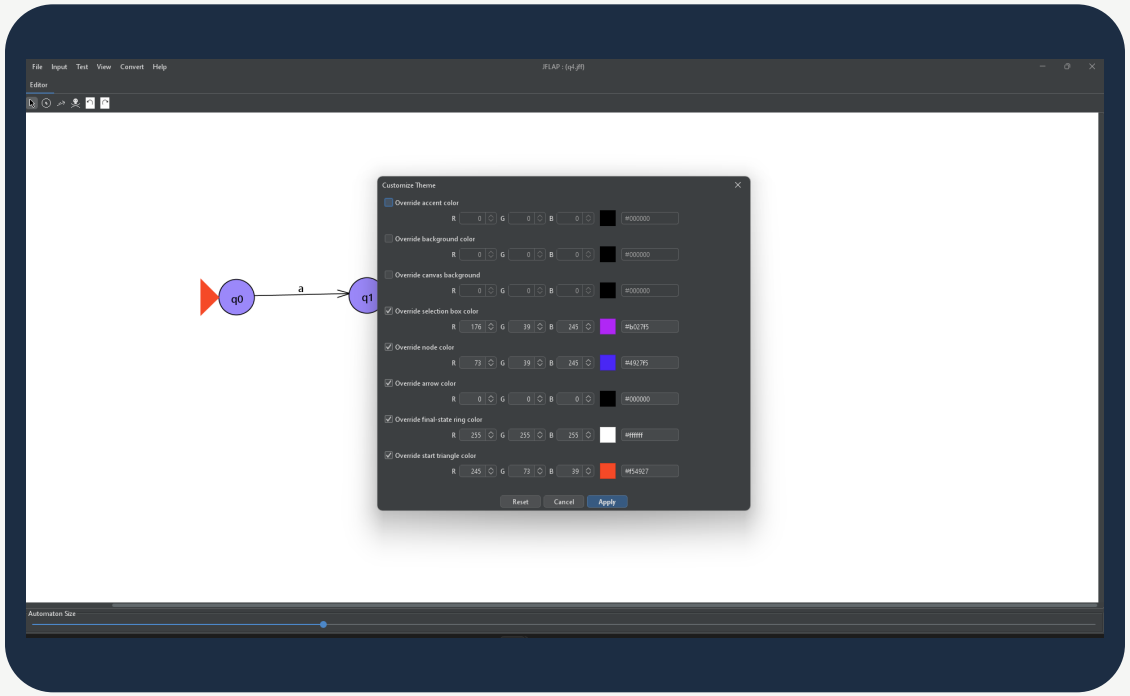

FEATURES

- Dark and light themes
- Command palette and canvas shortcuts
- PNG/SVG automata export

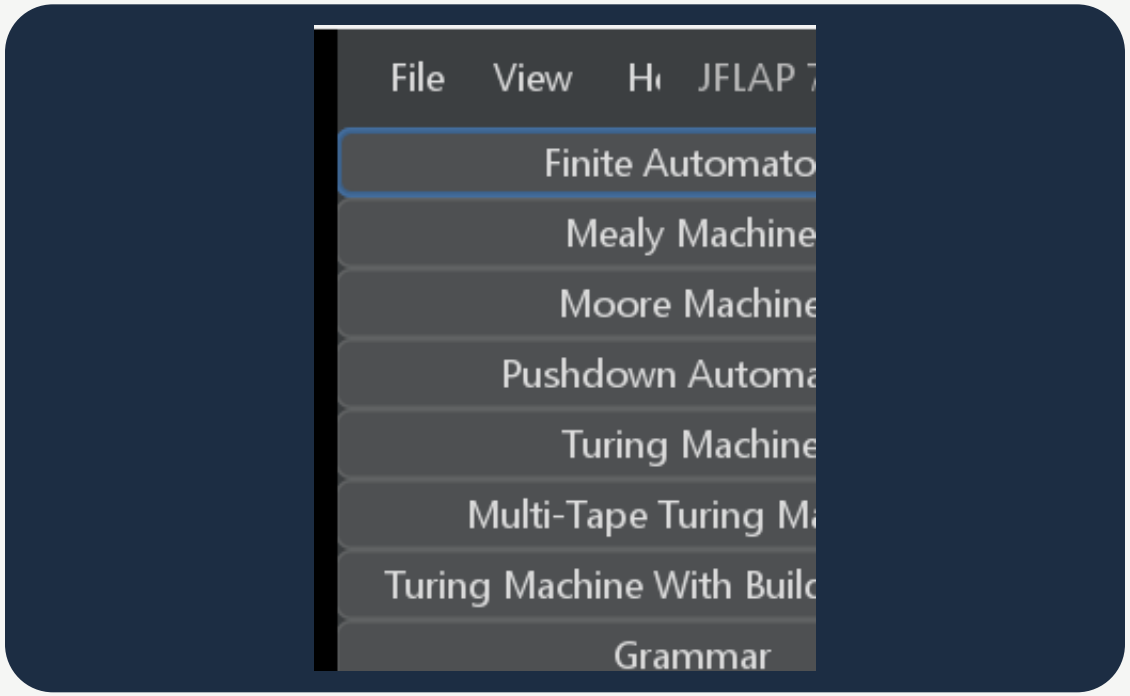

TECH STACK

Java / Swing / FlatLaf

JFLAP Better UI

RESULT & HANDOFF / 03

JFLAP Better UI

VERIFIED OUTCOME

The JAR was built locally, its --selftest passed, and the desktop process opened. The main theme image comes from the repository; the smaller second view is a fresh local runtime capture.

LOCAL CHECK

RUN: Built JAR; --selftest passed; Java desktop process opened.
